PROFILE

Front-end-focused engineer with 8+ years building web and mobile products, from airline purchase flows to connected-car fleet tools. Owns features end to end, from React and Next.js interfaces to the APIs, messaging, and asynchronous jobs behind them. Drives architectural decisions, helps shape product direction, and cares about performance, type safety, and well-tested code that's easy to change.

SKILLS

Front end	React, Redux, Next.js, TypeScript, React Native, Styled Components, Angular, HTML/CSS
Back end & data	Node.js, REST APIs, GraphQL, Apollo, MongoDB, TypeGoose, asynchronous jobs & messaging
Quality	Jest, React Testing Library, GraphQL Codegen, strict TypeScript, performance profiling

EXPERIENCE

Tail Light (Bouncie) · Senior Software Engineer — 2024 – Present

Build features end to end for Bouncie, a connected-car platform drivers and fleets use to track vehicles, manage access, and stay on top of maintenance. Drive many of the team's architectural decisions and help shape product direction and design.

- Designed and shipped permission-based user management end to end, controlling who can access which vehicles, across the React/Redux front end, backend APIs, and async jobs that copy notification and geofence settings between vehicles.
- Built Vehicle Care, giving fleet managers a single place to track vehicle maintenance and repairs.
- Added bulk export of notification settings across vehicles, moving the long-running geofence copy to an async job to keep the UI fast.
- Currently modernizing the company's public marketing site, Bouncie.com.

Stack React · Redux · Next.js · TypeScript · Node.js · REST APIs

Northwoods · Senior Developer — 2023 – 2024

- Rebuilt the mobile app's navigation structure, cutting screen load time from 20 seconds to under 1 second.
- Implemented Dark Mode with a new styling library, using Styled Components to enforce consistent theming across the codebase.

eFuse · Senior Software Engineer — 2022 – 2023

- Cut page load times by 86% by applying GraphQL best practices and reworking data fetching, taking key pages from 6 seconds to under 1.
- Fixed 1,000+ TypeScript errors to turn on strict mode, and introduced Codegen to generate types shared from back end to front end.
- Standardized the team's unit testing approach and mentored junior engineers on writing effective tests.

Stack Next.js · React · TypeScript · GraphQL · Apollo · MongoDB · Jest · RTL

Accenture · Software Engineer — 2019 – 2022

- Led front-end development of the purchase flow for United Airlines' onboard Wi-Fi in React.
- Led planning and delivery of a greenfield Angular portal giving Ford Motor Company employees access to its machine learning toolbox.

EARLIER

NetJets · Associate ServiceNow Developer
2018 – 2019 · Scoped and delivered ServiceNow projects for internal business teams.

EDUCATION

B.A., Philosophy
The Ohio State University · Columbus, OH
